

Supported Employment

Be Part of the Solution!

What is it?

Supported Employment/Individual Placement & Support (SE/IPS) is an evidence-based practice that helps people with mental illness and other disabilities identify, acquire, and keep jobs in their communities.

The impact:

- **Employees keep jobs THREE TIMES longer** than similar others without SE/IPS support.
- **60-70% of people in mental health recovery want to work**; Fewer than 15% are currently employed.
- **One in five adults experience a mental, behavioral, or emotional disorder.**
- Working helps people manage their conditions, **employers are provided with reliable employees**, and employees contribute to the local community and economy.
- If you are an employer, you likely have one or more employees currently working for you who are managing a disorder of this type; and **you are most likely already supporting someone's mental health recovery!**
